

Ghosts in Machines — Public Development Progress Checklist v0.1

Purpose: Website-facing progress tracker for Jonathan/dev team and public followers.

Format: Each item can become a checkbox card on the dev website.

Status Options: Not Started / In Progress / Testing / Complete / Blocked

Recommended Display: Phase sections with individual progress cards.

Overall Game Progress

- ☐ Project foundation complete
 - ☐ Core gameplay prototype complete
 - ☐ First playable test map complete
 - ☐ Inventory and survival systems complete
 - ☐ Maze prototype complete
 - ☐ AI survivor prototype complete
 - ☐ Machine enemy prototype complete
 - ☐ First vertical slice complete
 - ☐ Internal alpha complete
 - ☐ Public demo ready
 - ☐ Steam page ready
 - ☐ Early Access build ready
-

Phase 01 — Project Foundation

01.01 Project Direction Locked

- ☐ Confirm final merged concept: Ghosts in Machines + The 24th Trial
- ☐ Define final project title or working title
- ☐ Confirm core gameplay pillars
- ☐ Confirm target engine version
- ☐ Confirm PC/Steam as first platform
- ☐ Confirm single-player first approach
- ☐ Confirm multiplayer/co-op as future expansion only

01.02 Game Design Document

- ☐ Create updated GDD for the merged concept
- ☐ Replace outdated project names and systems
- ☐ Define the new player role

- ☐ Define the Maze / Dome / Trial structure
- ☐ Define the Safe Zone / Glade structure
- ☐ Define the 24 Survivors concept
- ☐ Define NPC survivor archetypes
- ☐ Define enemy machine classes
- ☐ Define survival systems
- ☐ Define crafting and inventory systems
- ☐ Define development phases

01.03 Development Checklist

- ☐ Create internal full development checklist
- ☐ Create public website progress checklist
- ☐ Create NoGlyph/Codex build order
- ☐ Create test checklist for each core system
- ☐ Create GitHub issue/task board

01.04 Repository Setup

- ☐ Create GitHub repository
 - ☐ Add Unreal `.gitignore`
 - ☐ Configure Git LFS for large files
 - ☐ Push initial documentation
 - ☐ Push initial folder structure
 - ☐ Create main branch
 - ☐ Create development branch
 - ☐ Create milestone labels
-

Phase 02 — Unreal Project Setup

02.01 Unreal Engine Setup

- ☐ Install Unreal Engine 5.7
- ☐ Create new Unreal project
- ☐ Use Blueprint-first workflow
- ☐ Set project name
- ☐ Configure project settings
- ☐ Set startup map
- ☐ Save clean baseline project
- ☐ Commit clean Unreal project setup

02.02 Plugin Setup

- ☐ Enable Enhanced Input

- ☐ Enable Gameplay Tags
- ☐ Enable AI / Behavior Tree tools
- ☐ Enable Navigation System
- ☐ Enable Niagara
- ☐ Enable PCG framework
- ☐ Enable Modeling Tools
- ☐ Install NoGlyph Blueprint Stack
- ☐ Connect Codex through NoGlyph
- ☐ Test NoGlyph connection in Unreal

02.03 Unreal Folder Structure

- ☐ Create `/Content/GhostsInMachines/`
- ☐ Create Blueprints folder
- ☐ Create Player folder
- ☐ Create AI folder
- ☐ Create Components folder
- ☐ Create UI folder
- ☐ Create Maps folder
- ☐ Create Items folder
- ☐ Create Data folder
- ☐ Create Materials folder
- ☐ Create Audio folder
- ☐ Create Dev/Test folder

02.04 Test Maps

- ☐ Create `Map_TestSystems`
- ☐ Create `Map_TestMaze`
- ☐ Create `Map_TestAI`
- ☐ Create `Map_PrototypeGlade`
- ☐ Create `Map_PrototypeMaze`
- ☐ Create `Map_MainMenu`
- ☐ Add player start to test maps
- ☐ Add basic lighting to test maps
- ☐ Add navigation mesh to AI test maps

Phase 03 — Core Player Setup

03.01 Player Character

- ☐ Create player character Blueprint
- ☐ Add first-person camera
- ☐ Add third-person camera option later

- ☐ Add walking movement
- ☐ Add sprinting
- ☐ Add crouching
- ☐ Add jumping
- ☐ Add camera shake placeholders
- ☐ Add player input mapping

03.02 Input System

- ☐ Create movement input actions
- ☐ Create look input action
- ☐ Create jump input action
- ☐ Create sprint input action
- ☐ Create crouch input action
- ☐ Create interact input action
- ☐ Create inventory input action
- ☐ Create hotbar input actions
- ☐ Create flashlight input action
- ☐ Create pause/menu input action
- ☐ Test all player inputs

03.03 Player HUD Foundation

- ☐ Create main HUD widget
 - ☐ Add health display
 - ☐ Add stamina display
 - ☐ Add hunger display
 - ☐ Add thirst display
 - ☐ Add battery/flashlight display
 - ☐ Add Survivor count placeholder
 - ☐ Add current zone placeholder
 - ☐ Add notification area
 - ☐ Add interaction prompt area
-

Phase 04 — Survival Systems

04.01 Health System

- ☐ Create health variable
- ☐ Add max health
- ☐ Add damage function
- ☐ Add healing function
- ☐ Add death condition
- ☐ Connect health to HUD
- ☐ Test damage in test map

- ☐ Test healing in test map

04.02 Stamina System

- ☐ Create stamina variable
- ☐ Add max stamina
- ☐ Add sprint stamina drain
- ☐ Add stamina regeneration
- ☐ Add exhaustion state
- ☐ Connect stamina to HUD
- ☐ Test sprint drain
- ☐ Test stamina regen

04.03 Hunger System

- ☐ Create hunger variable
- ☐ Add hunger drain over time
- ☐ Add low hunger warning
- ☐ Add starvation damage
- ☐ Add food consumption
- ☐ Connect hunger to HUD
- ☐ Test eating items
- ☐ Test starvation damage

04.04 Thirst System

- ☐ Create thirst variable
- ☐ Add thirst drain over time
- ☐ Add low thirst warning
- ☐ Add dehydration damage
- ☐ Add drinking items
- ☐ Connect thirst to HUD
- ☐ Test water consumption
- ☐ Test dehydration damage

04.05 Injury and Status Effects

- ☐ Add bleeding status
- ☐ Add poison status
- ☐ Add injured leg status
- ☐ Add exhaustion status
- ☐ Add status effect UI icons
- ☐ Add bandage treatment
- ☐ Add antidote/herbal treatment
- ☐ Test status effect removal

Phase 05 — Interaction System

05.01 Interaction Foundation

- [] Create interactable interface
- [] Add first-person line trace
- [] Add interaction distance
- [] Add current interactable reference
- [] Add interaction prompt text
- [] Add tap interaction
- [] Add hold interaction
- [] Test interaction prompt

05.02 Interactable Test Objects

- [] Create test pickup object
 - [] Create test loot crate
 - [] Create test door
 - [] Create test water source
 - [] Create test harvestable plant
 - [] Create test corpse/carcass
 - [] Test all object interactions
-

Phase 06 — Inventory and Hotbar

06.01 Inventory Data

- [] Create item type enum
- [] Create item rarity enum
- [] Create item data struct
- [] Create inventory slot struct
- [] Create item data table
- [] Add starter item rows
- [] Add placeholder item icons

06.02 Inventory Component

- [] Create inventory component
- [] Add inventory slots
- [] Add max slot count
- [] Add add item function
- [] Add remove item function
- [] Add drop item function

- [] Add use item function
- [] Add stack item support
- [] Test item pickup into inventory

06.03 Inventory UI

- [] Create inventory widget
- [] Create inventory slot widget
- [] Create selected item details panel
- [] Add item image display
- [] Add item name display
- [] Add item description display
- [] Add stack count display
- [] Add TAB open/close behaviour
- [] Match UI style to inventory mockup
- [] Test inventory UI with placeholder items

06.04 Hotbar / Belt System

- [] Create hotbar component
- [] Create hotbar slot widget
- [] Add 6 quick-use slots
- [] Add hotbar selection keys
- [] Add item assignment to hotbar
- [] Add selected slot highlight
- [] Test quick-use item behaviour

06.05 Drag and Drop

- [] Add single item drag
- [] Add stack drag
- [] Add stack split
- [] Add item swap between slots
- [] Add drop outside inventory behaviour
- [] Test drag/drop across inventory and hotbar

Phase 07 — Crafting and Harvesting

07.01 Crafting Data

- [] Create crafting recipe struct
- [] Create required item struct
- [] Create crafting recipes data table
- [] Add starter recipes
- [] Add spear recipe

- [] Add knife recipe
- [] Add bandage recipe
- [] Add arrow recipe
- [] Add trap recipe

07.02 Crafting Component

- [] Create crafting component
- [] Add known recipes list
- [] Add can craft function
- [] Add start crafting function
- [] Add crafting progress
- [] Add complete crafting function
- [] Add cancel crafting function
- [] Consume materials on craft
- [] Add crafted item to inventory
- [] Test starter recipes

07.03 Crafting UI

- [] Create crafting menu widget
- [] Add recipe list
- [] Add required materials display
- [] Add owned materials display
- [] Add craft button
- [] Add crafting progress bar
- [] Test crafting menu

07.04 Harvesting

- [] Create harvestable resource base
- [] Add branch/wood harvesting
- [] Add stone harvesting
- [] Add fibre plant harvesting
- [] Add herb harvesting
- [] Add berry harvesting
- [] Add carcass harvesting
- [] Add tool requirement checks
- [] Test harvesting into inventory

Phase 08 — Flashlight, Battery, and Visibility

08.01 Flashlight System

- [] Add flashlight to player

- ☐ Add flashlight toggle
- ☐ Add flashlight battery drain
- ☐ Add battery item support
- ☐ Add recharge/replace battery behaviour
- ☐ Connect flashlight to HUD
- ☐ Add click sound
- ☐ Test flashlight in dark maze area

08.02 Visibility System

- ☐ Add visibility value
 - ☐ Reduce visibility when crouched
 - ☐ Reduce visibility in foliage
 - ☐ Increase visibility when flashlight is on
 - ☐ Increase visibility when running
 - ☐ Connect visibility to AI detection later
-

Phase 09 — Stealth and Noise

09.01 Noise System

- ☐ Create noise component
- ☐ Add noise generation for sprinting
- ☐ Add noise generation for jumping
- ☐ Add noise generation for attacks
- ☐ Add noise generation for opening crates
- ☐ Add noise radius values
- ☐ Add debug noise visualization
- ☐ Test AI hearing placeholder

09.02 Stealth System

- ☐ Create stealth component
 - ☐ Add crouch stealth modifier
 - ☐ Add foliage stealth modifier
 - ☐ Add darkness stealth modifier
 - ☐ Add flashlight penalty
 - ☐ Add movement speed modifier
 - ☐ Test stealth score changes
-

Phase 10 — Maze and Safe Zone Foundation

10.01 Safe Zone / Glade

- ☐ Block out central Safe Zone
- ☐ Add elevator spawn point
- ☐ Add survivor gathering area
- ☐ Add storage area placeholder
- ☐ Add crafting area placeholder
- ☐ Add gate access points
- ☐ Add calm audio state
- ☐ Add safe zone trigger volume
- ☐ Test entering/exiting Safe Zone

10.02 Maze Gates

- ☐ Create Gate A placeholder
- ☐ Create Gate B placeholder
- ☐ Create Gate C placeholder
- ☐ Create Gate D placeholder
- ☐ Add locked state
- ☐ Add open state
- ☐ Add closing state
- ☐ Add gate animation placeholder
- ☐ Add interaction prompt
- ☐ Test opening/closing gate

10.03 Maze Blockout

- ☐ Create modular wall piece
- ☐ Create corner wall piece
- ☐ Create broken wall piece
- ☐ Create corridor tile
- ☐ Create junction tile
- ☐ Create dead-end tile
- ☐ Build first small maze test
- ☐ Add nav mesh to maze
- ☐ Test player traversal

10.04 Maze Overgrowth

- ☐ Create moss material
- ☐ Create ivy/vine decal placeholder
- ☐ Create wall top foliage layer
- ☐ Create floor moss layer
- ☐ Add overgrowth to test maze

- ☐ Test performance with foliage density
-

Phase 11 — Day/Night and Maze Rules

11.01 Time System

- ☐ Create time-of-day system
- ☐ Add day phase
- ☐ Add night phase
- ☐ Add time display/debug UI
- ☐ Add gate open time
- ☐ Add gate close time
- ☐ Test day/night cycle

11.02 Day Rules

- ☐ Allow maze exploration during day
- ☐ Allow resource gathering during day
- ☐ Reduce enemy aggression during day
- ☐ Add day ambience
- ☐ Test day gameplay loop

11.03 Night Rules

- ☐ Close maze gates at night
 - ☐ Increase enemy patrol activity
 - ☐ Disable or reduce safe resource gathering
 - ☐ Add night ambience
 - ☐ Add night warning notifications
 - ☐ Test night danger loop
-

Phase 12 — Survivor NPCs

12.01 NPC Survivor Data

- ☐ Create survivor archetype enum
- ☐ Create NPC survivor data struct
- ☐ Create NPC survivor data table
- ☐ Add Aggressor archetype
- ☐ Add Hunter archetype
- ☐ Add Runner archetype
- ☐ Add Trapper archetype

- [] Add Coward archetype
- [] Add Strategist archetype

12.02 NPC Survivor Character

- [] Create NPC survivor character
- [] Add health/stamina component
- [] Add inventory placeholder
- [] Add basic movement
- [] Add basic AI controller
- [] Add placeholder animations
- [] Test NPC spawn

12.03 NPC Basic AI

- [] Add wander behaviour
- [] Add flee behaviour
- [] Add chase behaviour
- [] Add attack behaviour
- [] Add investigate noise behaviour
- [] Add return to safe zone behaviour
- [] Test NPC behaviours

12.04 NPC Survivor Social/Survival Behaviour

- [] NPC can loot items
 - [] NPC can flee danger
 - [] NPC can hide
 - [] NPC can fight player
 - [] NPC can fight other NPCs
 - [] NPC can die
 - [] Survivor count updates on death
 - [] Test first 3 NPC Survivors
-

Phase 13 — Machine Enemies

13.01 Enemy Class Design

- [] Define Class C machines
- [] Define Class B machines
- [] Define Class A machines
- [] Define machine detection rules
- [] Define machine patrol rules
- [] Define machine night behaviour

13.02 Class C Machines

- [] Create basic drone enemy
- [] Create basic turret enemy
- [] Create basic trap actor
- [] Add detection logic
- [] Add activation/deactivation logic
- [] Test Class C enemy behaviour

13.03 Class B Machines

- [] Create Watcher enemy placeholder
- [] Add patrol behaviour
- [] Add hearing detection
- [] Add flashlight/electric detection later
- [] Add chase behaviour
- [] Add attack behaviour
- [] Test Watcher enemy at night

13.04 Class A Machines

- [] Create hybrid enemy concept
 - [] Create placeholder model/mesh
 - [] Add high-threat behaviour
 - [] Add late-game spawn rules
 - [] Test Class A prototype encounter
-

Phase 14 — Arena / Trial Features

14.01 Survivor Count System

- [] Track total Survivors
- [] Track living Survivors
- [] Track dead Survivors
- [] Add UI display
- [] Add survivor eliminated notification
- [] Test count updates

14.02 Trial Event System

- [] Create event manager
- [] Add event timer
- [] Add event warning UI
- [] Add supply drop event

- ☐ Add fog event
- ☐ Add machine surge event
- ☐ Add gate malfunction event
- ☐ Test manual event triggering

14.03 Supply Drops / Maze Caches

- ☐ Create supply drop actor
 - ☐ Create hidden cache actor
 - ☐ Add loot table support
 - ☐ Add marker/notification
 - ☐ Test supply drop spawn
 - ☐ Test cache looting
-

Phase 15 — Death, Respawn, and Backpack Retrieval

15.01 Player Death

- ☐ Add player death state
- ☐ Add death screen
- ☐ Add killer/source display
- ☐ Add restart option
- ☐ Add return to menu option
- ☐ Test player death

15.02 Backpack Drop

- ☐ Create backpack actor
- ☐ Store inventory contents on death
- ☐ Spawn backpack at death location
- ☐ Add backpack map/compass marker
- ☐ Allow backpack retrieval
- ☐ Restore inventory contents
- ☐ Test death and retrieval loop

15.03 Respawn Rules

- ☐ Define respawn location
- ☐ Respawn at elevator/Safe Zone
- ☐ Reset player vitals partially
- ☐ Keep backpack at death location
- ☐ Test respawn loop

Phase 16 — UI/UX and Menus

16.01 Main Menu

- [] Create main menu widget
- [] Add Start Game button
- [] Add Load Game button later
- [] Add Settings button
- [] Add Credits button
- [] Add Exit button
- [] Add background scene or image
- [] Test main menu flow

16.02 Pause Menu

- [] Create pause menu widget
- [] Add Resume button
- [] Add Save button later
- [] Add Settings button
- [] Add Exit to Menu button
- [] Test pause/resume flow

16.03 Loading Screen

- [] Create loading screen widget
- [] Add loading spinner
- [] Add random tips
- [] Add lore/facts text
- [] Test loading screen transition

16.04 Notifications

- [] Create notification widget
 - [] Add queue system
 - [] Add system message style
 - [] Add survivor eliminated message
 - [] Add gate warning message
 - [] Add event warning message
 - [] Test notification queue
-

Phase 17 — Save/Load and Settings

17.01 Settings System

- [] Create settings menu
- [] Add resolution setting
- [] Add graphics quality setting
- [] Add audio sliders
- [] Add mouse sensitivity
- [] Add keybind placeholder
- [] Save settings
- [] Load settings

17.02 Save System

- [] Create save game object
 - [] Save player stats
 - [] Save inventory
 - [] Save current map
 - [] Save safe zone progress
 - [] Save gate progress
 - [] Save survivor states later
 - [] Test save/load in test map
-

Phase 18 — Audio and Atmosphere

18.01 Ambient Audio

- [] Add Safe Zone ambience
- [] Add Maze day ambience
- [] Add Maze night ambience
- [] Add machine hum layer
- [] Add wind/foilage layer
- [] Add distant machine sounds
- [] Test audio state changes

18.02 UI Audio

- [] Add inventory open sound
- [] Add inventory close sound
- [] Add hover sound
- [] Add click sound
- [] Add warning sound

- ☐ Test UI audio

18.03 Enemy Audio

- ☐ Add drone sound placeholder
 - ☐ Add Watcher sound placeholder
 - ☐ Add machine alert sound
 - ☐ Add chase sound
 - ☐ Add attack sound
 - ☐ Test enemy audio cues
-

Phase 19 — Visual Polish and Performance

19.01 Maze Visual Pass

- ☐ Replace blockout walls with art-pass walls
- ☐ Add moss and grime materials
- ☐ Add overgrowth decals
- ☐ Add broken wall variants
- ☐ Add gate detail
- ☐ Add lighting pass
- ☐ Add fog/atmosphere pass

19.02 Foliage Optimization

- ☐ Define foliage quality levels
- ☐ Add foliage culling distances
- ☐ Disable collision on non-interactive foliage
- ☐ Use decals/materials for fake moss density
- ☐ Limit expensive foliage near camera only
- ☐ Test Nanite foliage performance
- ☐ Profile with Stat GPU
- ☐ Profile with Unreal Insights

19.03 Performance Targets

- ☐ Define target FPS
- ☐ Define target resolution
- ☐ Test low settings
- ☐ Test medium settings
- ☐ Test high settings
- ☐ Optimize shadows
- ☐ Optimize materials
- ☐ Optimize AI tick rates
- ☐ Optimize foliage density

Phase 20 — Vertical Slice

20.01 Vertical Slice Scope

- ☐ One playable Safe Zone
- ☐ One working gate
- ☐ One small maze section
- ☐ Survival stats working
- ☐ Inventory/hotbar working
- ☐ Crafting working
- ☐ Flashlight working
- ☐ One machine enemy working
- ☐ Three NPC Survivors working
- ☐ One event working
- ☐ Death/backpack loop working

20.02 Vertical Slice Test

- ☐ Start from main menu
- ☐ Spawn via elevator
- ☐ Explore Safe Zone
- ☐ Enter Maze
- ☐ Gather resources
- ☐ Craft basic item
- ☐ Encounter NPC Survivor
- ☐ Encounter machine enemy
- ☐ Survive or die
- ☐ Return to Safe Zone
- ☐ Save progress placeholder

20.03 Vertical Slice Polish

- ☐ Fix critical bugs
- ☐ Improve UI feedback
- ☐ Add missing sound cues
- ☐ Add loading screen
- ☐ Add basic tutorial prompts
- ☐ Optimize test area
- ☐ Record vertical slice footage

Phase 21 — Website Progress Tracker

21.01 Public Tracker Design

- ☐ Create website checklist layout
- ☐ Display each phase as a section
- ☐ Display each task as a card
- ☐ Add checkboxes
- ☐ Add status labels
- ☐ Add progress percentage per phase
- ☐ Add overall progress bar
- ☐ Add last updated date

21.02 Website Data Structure

- ☐ Convert this checklist to JSON
- ☐ Add phase IDs
- ☐ Add task IDs
- ☐ Add task titles
- ☐ Add task descriptions
- ☐ Add status field
- ☐ Add priority field
- ☐ Add assigned developer field later

21.03 Website Publishing

- ☐ Build static tracker page
 - ☐ Add to dev website
 - ☐ Add mobile responsive layout
 - ☐ Add search/filter later
 - ☐ Add public/private toggle later
 - ☐ Publish first progress update
-

Phase 22 — Steam Preparation

22.01 Steamworks Setup

- ☐ Confirm Steamworks account
- ☐ Pay Steam Direct fee
- ☐ Create app in Steamworks
- ☐ Fill basic app information
- ☐ Add developer/publisher info
- ☐ Add tax/payment information

22.02 Steam Store Page

- ☐ Create short description
- ☐ Create long description
- ☐ Create capsule art
- ☐ Create header capsule
- ☐ Create screenshots
- ☐ Create gameplay trailer
- ☐ Add system requirements
- ☐ Add tags
- ☐ Add Early Access description
- ☐ Submit store page for review

22.03 Steam Build Setup

- ☐ Create shipping build
 - ☐ Test packaged build locally
 - ☐ Set build version number
 - ☐ Upload build with SteamPipe
 - ☐ Create default branch
 - ☐ Create internal testing branch
 - ☐ Test Steam launch flow
 - ☐ Test controller/input later
-

Phase 23 — Alpha, Beta, and Launch

23.01 Internal Alpha

- ☐ Full vertical slice playable
- ☐ Core bugs fixed
- ☐ Basic save/settings working
- ☐ Internal team test complete
- ☐ Feedback collected
- ☐ Critical changes applied

23.02 Closed Beta

- ☐ Invite limited testers
- ☐ Create feedback form
- ☐ Track bugs in GitHub
- ☐ Fix blocker bugs
- ☐ Improve onboarding
- ☐ Balance survival systems
- ☐ Balance enemy difficulty

23.03 Public Demo / Early Access Candidate

- ☐ Prepare demo build
- ☐ Prepare trailer
- ☐ Prepare Steam page update
- ☐ Prepare devlog announcement
- ☐ Test final build
- ☐ Submit build for release review

23.04 Launch

- ☐ Set launch date
 - ☐ Publish launch devlog
 - ☐ Release Steam build
 - ☐ Monitor bug reports
 - ☐ Monitor player feedback
 - ☐ Prepare hotfix branch
 - ☐ Publish first patch notes
-

Phase 24 — Post-Launch Support

24.01 Patch Support

- ☐ Fix critical launch bugs
- ☐ Release hotfix 1
- ☐ Release hotfix 2 if needed
- ☐ Update known issues list
- ☐ Update roadmap

24.02 Content Expansion

- ☐ Add new maze sections
- ☐ Add new enemy variants
- ☐ Add new survivor archetypes
- ☐ Add new events
- ☐ Add new lore entries
- ☐ Add new craftable items

24.03 Community Updates

- ☐ Publish regular devlogs
- ☐ Publish roadmap updates
- ☐ Collect player suggestions
- ☐ Add voting/poll system later

- [] Maintain public checklist tracker
-

Public Progress Summary Template

Use this section on the website homepage or tracker intro.

Ghosts in Machines is currently in early development.

Current Focus:

Project setup, core survival systems, inventory, maze prototype, and AI-assisted Unreal development using Codex + NoGlyph Blueprint Stack.

Development Status:

- Planning: In Progress
- Unreal Setup: Not Started / In Progress
- Core Systems: Not Started
- Maze Prototype: Not Started
- AI Survivors: Not Started
- Machine Enemies: Not Started
- Vertical Slice: Not Started
- Steam Release: Not Started

Suggested Status Labels

- Not Started
- In Progress
- Testing
- Complete
- Blocked
- Deferred

Suggested Priority Labels

- Critical
- High
- Medium
- Low
- Future

Suggested Category Labels

- Planning
- Unreal Setup
- Player
- UI
- Inventory
- Survival
- Maze
- AI
- Enemies
- Audio
- Performance
- Steam
- Website
- Post-Launch
